***Examiner's Statement of Reasons for Allowance***

**Claims 44-67** are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's invention is drawn to a method of load control between a transport protocol sender and transport protocol receiver in a radio communications system. More specifically, applicant has discovered a novel procedure for transferring to the transport protocol receiver one or more signals carrying radio resource data from a radio resource management entity located in a radio network control node intermediate to the transport protocol sender and the transport protocol receiver. In addition, the transport protocol receiver uses the radio resource data received from the radio resource management entity to dynamically adapt transport protocol load to link state information between the transport protocol sender and the transport protocol receiver.

Applicant's independent claim 30 recites, *inter alia*, dynamically adapting transport protocol load to link state information between the transport protocol sender and the transport protocol receiver. Ameigeiras shows "transferring to said transport protocol receiver one or more signals carrying data from a radio resource management entity of a radio network control node intermediate to said transport protocol sender and said transport protocol receiver, said transport protocol receiver using said data to dynamically adapt transport protocol load." This is taught in figure 1, paragraph 15, when Ameigeiras teaches that a TCP sender sends data to a user equipment through a radio network controller. However, Ameigeiras and the cited references fail to disclose radio resource data but more importantly, the prior art of record fails to disclose dynamically adapting transport protocol load to link state information between the transport

Art Unit: 2617

protocol sender and the transport protocol receiver. In addition, one of ordinary skill in the art would not arrive at applicant's claimed invention without using impermissible hindsight and using applicant's claims/specification as a road map.

Accordingly, applicant's invention is allowed for these reasons and the reasons by applicant in amendments, arguments, and the appeal brief.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
